

Product	: 4- Methoxy Phenol
Synonymns	: Hydroquinone Monomethyl ether (MEHQ),
Mol Wt	: 124.10
Emperical Formula	: C ₇ H ₈ O ₂
Cas No.	: 150-76-5

Properties :

- MEHQ is a white or pale pink solid with a mild phenolic smell .
- It melts at 54 to 57 °C
- It has a boiling point of 243-246°C.
- It is partially soluble in cold water.
- Soluble in Acetone,Benzene,Toluene

APPLICATIONS:

- Polymerisation inhibitor in manufacturing of Acrylics, methacrylics ,VAM (Vinyl Acetate Monomer)
- Stabilizer for Cellulosic material, liquid detergents & cosmetics
- Intermediate
- Antioxidant
- U.V. Inks & Varnishes
- About 200ppm is used in manufacture of PVDC (Polyvinylidene) Resins & Films
- Printing Inks, Adhesives, paints.

Dosage : Will depends on application
